ABSTRACT

A living soul has appeared on our planet, and it cares for its offspring. In general, birds, animal world, even tall trees, and the world of plants cannot stand aside from this process of nature. Man, as a conscious being, has the responsibility of determining not only nature, but also the life of society, the future of society, and its development. In fact, the youth is the future of the country, the people's dignity, the hope of tomorrow, which shows the strength and power of the people, and a person like Sari cannot live without hope and future. Today, development is so fast that if you miss one opportunity, you will be left behind on many fronts. The attitude of our society towards the youth is no exception. In the following article some of the thoughts on the speech of the President of the Republic of Uzbekistan Shavkat Miromonovich Mirziyoyev to the people of the world at the 72nd session of the UN General Assembly.

KEYWORDS

Speech, youth, violence, social problems, attitude, planet.

INTRODUCTION

President Shavkat Miromonovich Mirziyoyev, in his speech at the 72nd session of the UN General Assembly, in his address specifically to the peoples of the world, to the leaders of the countries,

addressed the problems that threaten not only the youth of Uzbekistan or Central Asia, but also the youth of the whole world, and the future and development of the world public opinion. The

president did not ignore the existence of these problems, but he expressed the optimism of the problems and showed the way. After listening to the speech of our President from the podium of the world parliament, I was very proud of ourselves. He noted that the 14 to 30 years of age is accounted for 2 billion population of foreign youth. According to the President, the destiny of our planet lies in the ashes of these young people. The attention of the peoples of the world has been called for by the International Youth Organization, which deals with the problems of the youth in particular, by radically changing the attention of the youth. Indeed, the most painful crises and tragedies in the development of the world.

This is done with the participation of the youth group. Our president confirms the opinion that such tragic events as preparation, sale and distribution of narcotic substances, participation in hostilities on our planet, and participation in terrorist activities are carried out by the youth. In terms of population size, the country with the largest number of young people is India. Today, around 65% of India's population is under the age of 35. In India, young people are not united in a separate union, in many states, young people are united in societies and movements from a professional point of view, and they fight for their rights in the Parliament. And the government is mostly made up of the wealthy classes who brought themselves to power.

"In this regard, it is the most important task to form and educate people, first of all, young people's thinking based on enlightenment," our

president noted separately. On the Internet pages of TASS news agency (tass.ru), the President of Uzbekistan Shavkat Mirziyoyev suggested to the UN General Assembly to develop a convention on youth rights and to adopt a resolution on enlightenment and religious tolerance. Also, the head of Uzbekistan called on the world public to convey the "true humanitarian essence of Islam". "We value our holy religion as the embodiment of our ancient talents. We strongly condemn those who associate our holy religion with violence and bloodshed, and we will never compromise with them," he said. Our head of state appealed to the UN member states with "an offer to accept the special resolution of the UN General Assembly called "Enlightenment and religious tolerance". "The main purpose of this document is to ensure everyone's right to education, to help eliminate illiteracy and ignorance. This resolution is aimed at establishing tolerance and mutual respect, ensuring religious freedom, protecting the rights of people of faith, and helping to prevent their discrimination," he said.

"Center of Islamic Culture and Civilization" was established in Tashkent. The main purpose of this is to convey to the world community that Islam is not a terrorist religion, but a humanitarian religion. It is to convey to the peoples of the world that there were scholars who studied the theoretical and legal foundations of Islam, namely, our great-grandfathers Al-Bukhari, At-Tirmidhi, Sayyid Nasafi, Margiloni and Maturidi who came from Central Asia and with the help of Islamic culture and education, which lasted for 130 years and drinking alcohol, smoking cigarettes, etc., and

others were inherited from the last colonial period.

In every era, in every society, youth is recognized as a force that moves society and defines its essence. If you look at the history of our country, you know very well that in the period of national renaissance at the beginning of the 20th century, young people appeared on the stage of history as a powerful force. Pay attention to the structure of the government of Turkestan autonomy, or "Yosh Bukharas" under the leadership of Fayzulla Khojayev against the rule of the Amir, "Yosh Khivalars movement" behind the label of "printing", the main driving force of those who fought for the nation and homeland against the tyranny of the Shura were our young grandfathers. They were physically destroyed by the Shura system with various threats. We young people draw the right conclusions from the lessons of history and we must follow the teachings of our countryman.

On the basis of the decision of the head of our state on March 26, 2021, "On measures to fundamentally improve the system of spiritual and educational affairs", the idea "From national revival to national progress" is the result of updates in the socio-economic and political spheres, activities in the spiritual and educational direction. , serves as the basis of education and training methods that serve to form ideological immunity in young people.

It is not a secret to anyone that there is a struggle for the possession of the human mind and heart in the present era. Therefore, interruptions in the fight against foreign ideological influences cannot

be allowed. In such conditions, it is important to organize a constant and continuous counter-propaganda against the subversive influence of foreign ideas.

In short, in order to overcome the above-mentioned problems, firstly, it is necessary to form a propaganda system, secondly, to consider and assess the external and internal political situation on the basis of national interests, connecting it with the national ideology, and thirdly, to determine the foundations of the national ideology and specific political goals. it will be necessary to develop and improve the mechanisms of their implementation.
